

Moenie enige van hierdie simptome ignoreer nie

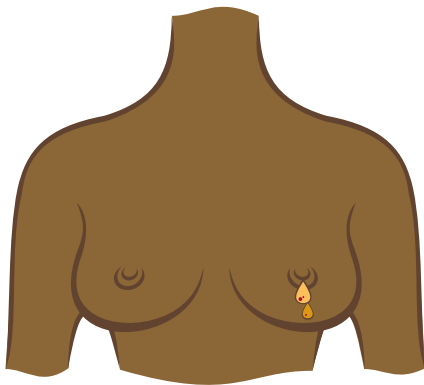

Dit kan borskanker wees.
As dit vroeg opgetel word, kan dit lewens red.

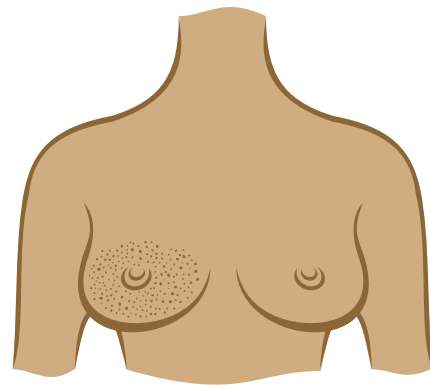

Enige knop of verharding in die bors of onder die arm, met of sonder pyn

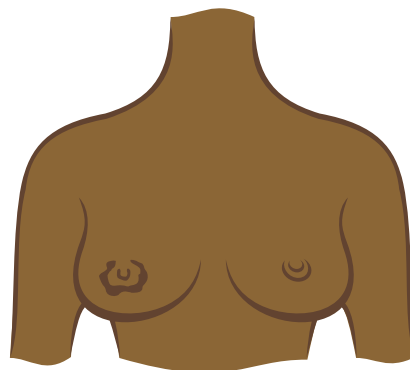

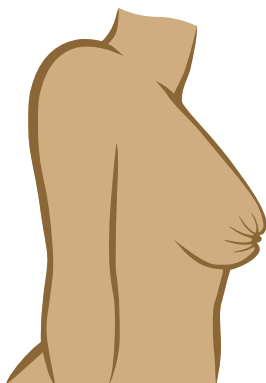

Verandering in die grootte, vorm of voorkoms van jou bors

Ongewone of bloedige vloeistof wat uit die tepel kom

Verandering aan die bors se vel, soos kuiltjies (soos lemoenskil), rooiheid of donker verkleuring

Verandering in die vorm of hoe die tepel lyk, soos as dit na binne toe trek

Gaan na jou plaaslike kliniek of gesondheidswerker toe, selfs al is jy nie bekommerd nie.
